1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-9, 11, 24, 28 and 32, drawn to a catalytic system which apparently is an apparatus, classified in class 422, subclass various depending on the specifics of the remainder of the apparatus.
- II. Claims 2, 10, 12-23, 25-27, 29-31 and 33, drawn to a "method of converting a reactant to a product", classified in class 502, subclass 527.11 inter alia depending on the specifics of the catalyst used etc.
- 2. The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practice by another materially different apparatus or by hand, for instance simply in a beaker or an autoclave.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- A telephone call was made to Frank Rosenberg, Esq., on 2/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(j).

- 6. Figures 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. If these two figures are not in fact prior art, applicants are requested to point out where in the specification they are clearly asserted to be inventive, particularly since there are numerous prior art references to catalysts and cocatalysts covalently bonded to supports (figure 2), and sealed spectroscopy cells having flow-through features are conventional in the art of analytical chemistry (figure 3). This objection is made now for the sake of expediting prosecution.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Pasterczyk whose telephone number is 571-272-1375. The examiner can normally be reached on M-F from 9 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell, can be reached at 571-272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
